

- Machines for small and medium series production as well as small to medium component sizes
- Individual components can be selected specific to a project
- Integrated melting unit with double-acting plunger pump
- Melting capacity for small to medium shot weights and/or small to medium annual quantities
- Clamping force for components with a maximum total moulding surface of approx. 3000mm² (at maximum pressure of 40 bar)
- Siemens S7-1200 control with touchpanel and convenient operation by pictograms

Technical data

Operating temperature:	max. 250°C
Melt pressure:	0,5-4,0 MPa/ 5- 40 bar
Clamping force:	12 kN
Tank volume:	4 l
Melting capacity:	ca. 1kg/h
Electrical connection:	230V/ 50Hz.
Power input:	2,5 kW

Machine variants:

Machine table

single table
manual sliding table

Injection direction

horizontal
vertical

Closing unit

9kN manual toggle lever
12 kN pneumatic

Optional equipment

pneum. mold release
